PROFILE

Undergraduate student pursuing BS in Data Science and Applications from IIT Madras. Passionate about building practical AI-powered applications across research tools, technology, and personal finance. Interested in machine learning, frontend engineering, and research.

EDUCATION

Indian Institute of Technology, Madras <i>BS in Data Science and Applications</i>	2025 – Present
Minerva College of Education, Kangra <i>Bachelor of Computer Applications (BCA)</i>	2025 – Present
Partap World School, Kangra <i>Class XII (CBSE)</i>	2025
Partap World School, Kangra <i>Class X (CBSE)</i>	2023

TECHNICAL SKILLS

- **Languages:** Python, C, HTML, CSS, JavaScript
- **Libraries/Tools:** NumPy, Pandas, Matplotlib, Jupyter Notebook, Git, VS Code
- **Core Areas:** Data Science Basics, Programming Fundamentals, Mathematics, AI Applications
- **Web Technologies:** React (Learning), Tailwind CSS, Firebase Basics

PROJECTS

Reviewer's Desk – AI Research Paper Review Tool | [View Live](#)

- Built an AI-assisted research paper review system that parses PDFs into structured sections (Abstract, Method, Experiments) and generates grounded peer-review comments anchored to the source.
- Implemented figure and table citation cross-checking to detect uncited captions — a common pre-submission oversight.
- Supports four review modes: Conference, Journal, Course PR, and Self-Review.

NagarSetu – Civic Accountability Platform | [View Live](#)

- Built a civic issue reporting app for small-town India that auto-routes complaints (potholes, broken streetlights, sanitation) to the correct municipal department based on AI image classification and ward location.
- Implemented a public accountability map where reported issues are visible to neighbors who can upvote and add supporting evidence, creating social pressure alongside the bureaucratic trail.
- Designed for first-time smartphone users — submission under 30 seconds with auto-detected issue type.

Paisa – Personal Finance for Indian Students | [View Live](#)

- Built a UPI-aware expense tracker tailored to Indian student spending patterns — chai, mess splits, hostel rent, and family transfers — with voice input in Hindi and English.
- Implemented auto-categorization and UPI transaction detection from PhonePe, GPay, and Paytm to eliminate manual logging.
- Designed a "remaining this month" budget dashboard to reduce end-of-month financial anxiety for students on fixed allowances.

ACHIEVEMENTS & CERTIFICATIONS

- Reviewer at Ciena Solutions Challenge judged student projects on tech innovation, community impact, and sustainability.
- Completed I-Global Course by University of Illinois Urbana-Champaign.
- Actively participated in academic and technology-focused activities and self-learning initiatives.

EXTRACURRICULAR INTERESTS

- Frontend Design and UI Development
- Machine Learning and AI Applications
- Civic Technology and Social Impact
- Continuous Learning through Courses and Projects
